Debug PDF export - make it wrap lines
Save default show/hide checkboxes settings
Fix variable height - base it on the number of characters, the font size, and any line breaks.
Settings: Show/hide date, time, menu buttons
Settings: add font sizes and families
Shawn's idea - journal prompts. Save them to JSON and then add the ability to make custom prompts in the Settings menu.
Put settings in a canvas with a scrollbar so that it can be scrollable
If default color scheme not found, display a message asking the user to pick a color scheme from the dropdown menu.
Get entry stats - entry count, word count, character count, etc.
Checkbox entries - make them go to the bottom when checked.

Make switching color schemes via cmd+arrow keys actually save the default color scheme.
Show/hide checkboxes
Key shortcut for show/hide checkboxes - cmd+shift+h ?
Export to csv, txt, or pdf
